some useful hints, thanks. 1/ Overheating is quite common in our tropical climate, but all the cases I have heard about are Polaris. 2/ if the fan wiring is disconnected and the fan run continuously per direct line to battery there is no problem. 3/ problem seems to be that even when the display is showing "hot - check engine", or the radiator is actually boiling, the fan is still cutting in

### **My 2016 polaris ranger is overheating the fan does not**

The 2015 and 2016 Polaris Ranger 570 recreational off-highway vehicles (ROVs) are under recall after the Minnesota company received seven reports of the products overheating and catching on fire.

### **Polaris Ranger 800 Overheating - YouTube**

It does sound like a stuck thermostat. Sometimes they can be freed up with w/p lube and a little tapping on the housing. The other thing that can cause immediate overheating is a blown head gasket or cracked head, allowing exhaust gasses into the cooling system.

## **XP 1000 overheating almost immediately | Polaris RZR Forum**

Ok so I have a Polaris ranger xp 08 I think . I started it up no problem( never had any ) drove it out of the garage about 15 feet and let it idle for about 5 mins . Then it started to sputter , gave it some gas and it stalled out. Tried to start it a couple times but wouldn't go. I figured gas was low, put some in but same thing .
